Package ‘ATR’

January 9, 2020

Title Alternative Tree Representation
Date 2020-01-08
Version 0.1-1
Description Plot party trees in left-right orientation instead of the classical top-down layout.
Depends grid, partykit
Suggests trtf, mlbench
Imports stats
License GPL-2
NeedsCompilation no

R topics documented:

rotate ................................................................. 2

Index 4
Description

Changes the class of a party object.

Usage

rotate(m, to = "left", ...)

Arguments

m

an object of class party

to

a character, only left is implemented at the moment.

... additional arguments, currently ignored.

Details

Adds a new class allowing for improved tree printing.

Note

This package was written by the students participating in the Advanced R Programming course taught in spring semester 2017 at University of Zurich.

Examples

data("airquality", package = "datasets")

m <- ctree(Wind ~ ., data = airquality)

plot(rotate(m), main = "TREE", tnex = 1.5)

if (require("trtf")) {
  data("Ozone", package = "mlbench")
  Ozone <- subset(Ozone, complete.cases(Ozone))
  Ozone <- as.data.frame(lapply(Ozone, function(x) {
    x <- x[, drop = TRUE]
    if (is.factor(x)) return(as.ordered(x))
    x
  })))
  response <- "V4"
  Ozone[[response]] <- as.numeric(Ozone[[response]])

  ns <- 20
  fm <- V4 ~ V1 + V2 + V3 + V5 + V6 + V7 + V8 + V9 + V10 + V11 + V12 + V13
  mtry <- ceiling(length(all.vars(fm[[3]])) / 3)
  var_m <- numeric_var("V4", support = quantile(Ozone[[response]], prob = c(.1, .9)),
                      add = range(Ozone[[response]]) -
quantile(Ozone[[response]], prob = c(.1, .9)),
        bounds = c(0, Inf))

B_m <- Bernstein_basis(var_m, order = 4, ui = "increasing")
uc_ctm_Ozone <- ctm(B_m, data = Ozone, todistr = "Normal")

tt_Ozone <- trafotree uc_ctm_Ozone, formula = fm, data = Ozone,
        control = ctree_control(mincriterion = .95, minsplit = 2*ns,
                                   minbucket = ns))

plot(rotate(tt_Ozone), tp_args = list(type = "density", id = FALSE,
            ylines = 0, K = 100, fill = "lightgrey"),
        terminal_panel = trtf::node_mlt)
