Package ‘ROI.models.globalOptTests’

August 29, 2020

Type Package
Title 'ROI' Optimization Problems Based on 'globalOptTests'
Version 1.1-1
Author Florian Schwendinger [aut, cre]
Maintainer Florian Schwendinger <FlorianSchwendinger@gmx.at>
Description A collection of non-linear optimization problems with box bounds transformed into 'ROI' optimization problems.
This package provides a wrapper around the 'globalOptTests' which provides a collection of global optimization problems.
More information can be found in the 'README' file.

Imports ROI (>= 0.3-0), globalOptTests
Suggests Rglpk (>= 0.6-2)
License GPL-3
RoxygenNote 6.0.1
NeedsCompilation no
Repository CRAN
Date/Publication 2020-08-29 19:10:08 UTC

R topics documented:

globopt .................................................. 1

Index

globopt  Access globalOptTests

Description

Get one or more optimization problems, meta information or a listing of the available globalOptTests problems.
Usage

Arguments

x  a character giving the names of the optimization problems to be returned, if x is "all" all available problems are returned, if x is the name of a single problem the given problem is returned. If x is missing a listing of all available problems is returned. If x is "metainfo" the meta information about the problems is returned.

Examples

## list all available MIPLIB-2010 problems
globopt()
## get all miplib problems
globopt("all")
## get a single problem
globopt("MieleCantrell")
## get the meta information
globopt("metainfo")
