Package ‘RobinHood’

March 1, 2021

Type  Package
Title  Interface for the RobinHood.com No Commission Investing Platform
Version 1.6
Author Joseph Blubaugh
Maintainer Joseph Blubaugh <jestonblu@gmail.com>
Description Execute API calls to the RobinHood <https://robinhood.com> investing platform. Functionality includes accessing account data and current holdings, retrieving investment statistics and quotes, placing and canceling orders, getting market trading hours, searching investments by popular tag, and interacting with watch lists.
Imports jsonlite, lubridate, profvis, magrittr, dplyr, httr, uuid
License GPL-3
URL https://github.com/JestonBlu/RobinHood
RoxygenNote 7.1.1
NeedsCompilation no
Repository CRAN
Date/Publication 2021-03-01 15:50:02 UTC

**Index**

<table>
<thead>
<tr>
<th>api_accounts</th>
<th>RobinHood API: User</th>
</tr>
</thead>
</table>

**Description**

Backend function called by `get_user()` returns a list of user account data.

**Usage**

```
api_accounts(RH)
```

**Arguments**

- **RH** object of class RobinHood

---

<table>
<thead>
<tr>
<th>api_accounts_crypto</th>
<th>RobinHood API: User Crypto</th>
</tr>
</thead>
</table>

**Description**

Backend function which calls the Nummus API to return the account id.

**Usage**

```
api_accounts_crypto(RH)
```

**Arguments**

- **RH** object of class RobinHood
api_contracts

RobinHood API: ACH

Description

Backend function for interacting and getting data on linked bank accounts.

Usage

```r
api_ach(
  RH, 
  action, 
  amount = NULL, 
  status_url = NULL, 
  cancel_url = NULL, 
  transfer_url = NULL
)
```

Arguments

- **RH**: object of class RobinHood
- **action**: (string) one of "transfers", "relationships", "schedules", "status", "cancel", "deposit", "withdraw"
- **amount**: (numeric) amount in dollars you want to deposit or withdraw (NULL if not one of those actions)
- **status_url**: (string) URL returned by place_ach_transfer()
- **cancel_url**: (string) URL returned by place_ach_transfer()
- **transfer_url**: (string) url of your linked account, output of get_ach(RH, "relationships")

api_contracts

RobinHood API: Option Contract Instruments

Description

RobinHood API: Option Contract Instruments

Usage

```r
api_contracts(RH, chain_symbol, type)
```

Arguments

- **RH**: object of class RobinHood
- **chain_symbol**: (string) a single ticker symbol
- **type**: (string) one of call or put
**api_currency_pairs**  

### Description

Returns the ID for a particular paired currency

### Usage

api_currency_pairs(RH)

### Arguments

- RH: object of class RobinHood

---

**api_endpoints**  

### Description

Backend function called by almost every function. Returns the appropriate starting URL for a given endpoint.

### Usage

api_endpoints(endpoint, source = "equity")

### Arguments

- endpoint: (string) which api endpoint to look up?
- source: (string) directs api to api.robinhood.com (equity) vs nummus.robinhood.com (crypto)
api_fundamentals  RobinHood API: Fundamentals

Description

Backend function called by get_fundamentals(), watchlist(). Returns a data frame of descriptive data for a given ticker symbol.

Usage

api_fundamentals(RH, ticker)

Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object of class RobinHood</td>
</tr>
<tr>
<td>ticker</td>
<td>(string) vector of ticker symbols</td>
</tr>
</tbody>
</table>

api_historicals  RobinHood API: Historicals

Description

Backend function called by get_historicals(). Returns a data frame of historical price data.

Usage

api_historicals(RH, historicals_url, body)

Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object of class RobinHood</td>
</tr>
<tr>
<td>historicals_url</td>
<td>(string) api url</td>
</tr>
<tr>
<td>body</td>
<td>(string) api body</td>
</tr>
</tbody>
</table>
api_historicals_crypto

RobinHood API: Historicals crypto

Description

Backend function called by get_historicals_crypto(). Returns a data frame of historical price data.

Usage

api_historicals_crypto(RH, url)

Arguments

RH object of class RobinHood
url (string) full url coming from get_historicals_crypto

api_instruments

RobinHood API: Instruments

Description

Backend function called by get_tag(), get_position(), watchlist(). Returns a list of instrument data.

Usage

api_instruments(RH, symbol = NULL, instrument_url = NULL)

Arguments

RH object of class RobinHood
symbol (string) a single symbol
instrument_url (string) instrument url
api_instruments_options

RobinHood API: Option Contract Instruments

**Description**

RobinHood API: Option Contract Instruments

**Usage**

api_instruments_options(RH, option_instrument_url)

**Arguments**

- RH: object of class RobinHood
- option_instrument_url: (string) url

---

api_login

RobinHood API: Login

**Description**

Backend function called by RobinHood(). Returns a list like object of class RobinHood which stores tokens required by all other functions.

**Usage**

api_login(username, password, mfa_code)

**Arguments**

- username: (string) RobinHood username
- password: (string) RobinHood password
- mfa_code: (string) Provided by your authentication app
**api_logout**  
*RobinHood API: Logout*

**Description**
Backend function called by logout(). Sends a logout call and disables your oauth2 token.

**Usage**

```r
api_logout(RH)
```

**Arguments**

- `RH`: object of class RobinHood

---

**api_marketdata**  
*RobinHood API: Market Data*

**Description**
Returns a dataframe of quantitative market information for a particular option instrument

**Usage**

```r
api_marketdata(RH, instrument, type = "instrument_id")
```

**Arguments**

- `RH`: object of class RobinHood
- `instrument`: (string) a single instrument_id or multiple instrument_urls
- `type`: (string) one of instrument_id or instrument_url
api_markets

RobinHood API: Markets

Description

Backend function called by get_market_hours(). Returns a data frame of markets data and trading hours.

Usage

api_markets(RH, markets_url, type = "df")

Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object of class RobinHood</td>
</tr>
<tr>
<td>markets_url</td>
<td>(string) a single market url</td>
</tr>
<tr>
<td>type</td>
<td>(string) structure of data returned, 'df' or 'list'</td>
</tr>
</tbody>
</table>

api_orders

RobinHood API: Orders

Description

Backend function called by place_order(), get_order_status(), cancel_order(). Issues a buy/sell order or returns the status of an order. When issuing a buy order use the url column in the return data to check the status or cancel the order.

Usage

api_orders(
    RH,
    action,
    status_url = NULL,
    cancel_url = NULL,
    instrument_id = NULL,
    symbol = NULL,
    type = NULL,
    time_in_force = NULL,
    trigger = NULL,
    price = NULL,
    stop_price = NULL,
    quantity = NULL,
    side = NULL,
    page_size = NULL
)
Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object of class RobinHood</td>
</tr>
<tr>
<td>action</td>
<td>(string) one of &quot;order&quot;, &quot;status&quot;, &quot;cancel&quot;, or &quot;history&quot;</td>
</tr>
<tr>
<td>status_url</td>
<td>(string) if action = &quot;status&quot;, status_url is required (output from place_order())</td>
</tr>
<tr>
<td>cancel_url</td>
<td>(string) if action = &quot;cancel&quot;, cancel_url is required (output from place_order())</td>
</tr>
<tr>
<td>instrument_id</td>
<td>(string) URL of the instrument_id</td>
</tr>
<tr>
<td>symbol</td>
<td>(string) Ticket symbol you are attempting to buy or sell</td>
</tr>
<tr>
<td>type</td>
<td>(string) &quot;market&quot; or &quot;limit&quot;</td>
</tr>
<tr>
<td>time_in_force</td>
<td>(string) Good For Day (&quot;gfd&quot;), Good Till Cancelled (&quot;gtc&quot;), Immediate or Cancel (&quot;ioc&quot;), or Opening (&quot;opg&quot;)</td>
</tr>
<tr>
<td>trigger</td>
<td>(string) &quot;immediate&quot; or &quot;stop&quot;</td>
</tr>
<tr>
<td>price</td>
<td>(number) the price you are willing to sell or buy at</td>
</tr>
<tr>
<td>stop_price</td>
<td>(number) if trigger = stop, enter stop price, otherwise leave blank</td>
</tr>
<tr>
<td>quantity</td>
<td>(int) number of shares you wish to transact</td>
</tr>
<tr>
<td>side</td>
<td>(string) &quot;buy&quot; or &quot;sell&quot;</td>
</tr>
<tr>
<td>page_size</td>
<td>(int) for get_order_history, refers to the number of historical records to return</td>
</tr>
</tbody>
</table>

Description

Backend function called by place_order(), get_order_status(), cancel_order(). Issues a buy/sell order or returns the status of an order. When issuing a buy order use the url column in the return data to check the status or cancel the order.

Usage

```python
callable(api_orders_crypto(
    RH,
    action,
    order_id = NULL,
    cancel_url = NULL,
    currency_pair_id = NULL,
    type = NULL,
    time_in_force = NULL,
    price = NULL,
    quantity = NULL,
    side = NULL
))
```
Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object of class RobinHood</td>
</tr>
<tr>
<td>action</td>
<td>(string) one of &quot;order&quot;, &quot;status&quot;, &quot;cancel&quot;, or &quot;history&quot;</td>
</tr>
<tr>
<td>order_id</td>
<td>(string) action is &quot;status&quot; or &quot;cancel&quot;, only order_id is required</td>
</tr>
<tr>
<td>cancel_url</td>
<td>(string) url for posting a cancel order</td>
</tr>
<tr>
<td>currency_pair_id</td>
<td>(string) currency pair id</td>
</tr>
<tr>
<td>type</td>
<td>(string) &quot;market&quot; or &quot;limit&quot;</td>
</tr>
<tr>
<td>time_in_force</td>
<td>(string) Good For Day (&quot;gfd&quot;), Good Till Canceled (&quot;gtc&quot;), Immediate or Cancel (&quot;ioc&quot;), or Opening (&quot;opg&quot;)</td>
</tr>
<tr>
<td>price</td>
<td>(number) the price you are willing to sell or buy at</td>
</tr>
<tr>
<td>quantity</td>
<td>(int) number of shares you wish to transact</td>
</tr>
<tr>
<td>side</td>
<td>(string) &quot;buy&quot; or &quot;sell&quot;</td>
</tr>
</tbody>
</table>

Usage

api_orders_options(RH, action, status_url = NULL, cancel_url = NULL, quantity = NULL, direction = NULL, stop_price = NULL, type = NULL, time_in_force = NULL, side = NULL, option_id = NULL)

Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object of class RobinHood</td>
</tr>
<tr>
<td>action</td>
<td>(string) one of &quot;order&quot;, &quot;status&quot;, &quot;cancel&quot;, or &quot;history&quot;</td>
</tr>
<tr>
<td>status_url</td>
<td>(string) if action = &quot;status&quot;, status_url is required (output from place_order_options())</td>
</tr>
<tr>
<td>cancel_url</td>
<td>(string) if action = &quot;cancel&quot;, cancel_url is required (output from place_order_options())</td>
</tr>
</tbody>
</table>
quantity (int) number of contracts you want to buy
direction (string) one of "debit" or "credit"
stop_price (numeric) stop price on a limit order
type (string) one of "limit" or "market"
time_in_force (string) Good TillCanceled ("gte"), Immediate or Cancel ("ioc"), or Opening ("opg")
side (string) one of "buy" or "sell"
option_id (string) id column returned by get_contracts()

---

**api_portfolios**

RobinHood API: Portfolio

**Description**

Backend function called by get_portfolio(). Returns a data frame of account summaries.

**Usage**

api_portfolios(RH, portfolio_url)

**Arguments**

- RH object of class RobinHood
- portfolio_url portfolio url

---

**api_portfolios_crypto**

RobinHood API: Portfolio Crypto

**Description**

Backend function called by get_portfolio(..., source = "crypto"). Returns a data frame of the current crypto portfolio summary.

**Usage**

api_portfolios_crypto(RH)

**Arguments**

- RH object of class RobinHood
 api_positions

RobinHood API: Positions

Description

Backend function called by get_positions(). Returns a data frame of instrument position data.

Usage

api_positions(RH)

Arguments

RH object of class RobinHood

api_positions_crypto

RobinHood API: Cryptocurrency Positions

Description

Backend function called by get_positions(). Returns a data frame of crypto position data via the Nummus api.

Usage

api_positions_crypto(RH)

Arguments

RH object of class RobinHood

api_positions_options

RobinHood API: Option Contract Positions

Description

Backend function called by get_positions_options(). Returns a data frame of owned options contracts.

Usage

api_positions_options(RH)

Arguments

RH object of class RobinHood
**api_quote**

**RobinHood API: Quote**

**Description**

Backend function called by get_positions(), get_quote(), place_order(). Returns a data frame of quote data.

**Usage**

```r
api_quote(RH, symbols_url)
```

**Arguments**

- `RH`: object of class RobinHood
- `symbols_url`: (string) url of query with ticker symbols

**api_quote_crypto**

**RobinHood API: Quotes for cryptocurrency**

**Description**

Returns a dataframe of current quotes.

**Usage**

```r
api_quote_crypto(RH, symbols_url)
```

**Arguments**

- `RH`: object of class RobinHood
- `symbols_url`: (string) url of query with ticker symbols
### api_ratings

**RobinHood API: Analyst ratings**

**Description**

Backend function called by `get_ratings()` to get analyst rating from RobinHood.

**Usage**

```r
api_ratings(RH, symbol)
```

**Arguments**

- **RH** object of class `RobinHood`
- **symbol** (string)

### api_tag

**RobinHood API: Tag**

**Description**

Backend function called by `get_tag()`. Returns a list of instrument ids.

**Usage**

```r
api_tag(RH, tag)
```

**Arguments**

- **RH** object of class `RobinHood`
- **tag** (string) a hyphenated tag such as "100-most-popular"

### api_tickers

**RobinHood API: Tickers**

**Description**

Backend function called by `get_ticker`. Returns a data frame of all instruments listed on RobinHood.

**Usage**

```r
api_tickers(RH)
```

**Arguments**

- **RH** object of class `RobinHood`
**api_user**

**RobinHood API: User**

**Description**

Backend function called by get_user() to return user data

**Usage**

api_user(RH)

**Arguments**

RH object of class RobinHood

---

**api_watchlist**

**RobinHood API: watchlist**

**Description**

Backend function called by watchlist(). Adds or remove instruments from the default watchlist. The create and delete watchlist features are disabled as it appears that the functionality is not currently available on the plateform.

**Usage**

api_watchlist(RH, watchlist_url, detail = FALSE, delete = FALSE)

**Arguments**

RH object of class RobinHood

watchlist_url (string) a single watchlist url

detail (logical) if null use header api only, otherwise pass options

delete (logical) send delete call
cancel_ach_transfer

Cancel an ACH transfer from your RobinHood account

Description
Cancel an ACH transfer from your RobinHood account

Usage
cancel_ach_transfer(RH, cancel_url)

Arguments
- RH: object of class RobinHood
- cancel_url: (string) cancel url returned from initiating a transfer with place_ach_transfer()

cancel_order

Cancel an existing order on RobinHood

Description
Send a cancel signal for a particular order to RobinHood. You will need to retain the buy/sell order url returned from place_order.

Usage
cancel_order(RH, cancel_url)

Arguments
- RH: object of class RobinHood
- cancel_url: (string) cancel url returned from place_order()

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an order, should generate an email confirmation
x <- place_order(RH = RH,
                 symbol = "GE",       # Ticker symbol you want to trade
                 type = "market",   # Type of market order
                 time_in_force = "gfd", # Time period the order is good for (gfd: good for day)
                 trigger = "immediate", # Trigger or delay order
                 price = 8.96,        # The highest price you are willing to pay
cancel_order_crypto

quantity = 1, # Number of shares you want
side = "buy") # buy or sell

# Cancel the order, should also generate an email confirmation
cancel_order(RH, x$cancel_url)

## End(Not run)

cancel_order_crypto    Cancel an existing crypto order on RobinHood

Description
Send a cancel signal for a particular order to RobinHood. You will need to retain the buy/sell order url returned from place_order.

Usage
cancel_order_crypto(RH, cancel_url)

Arguments
RH          object of class RobinHood
cancel_url  (string) cancel url returned from place_order_crypto()

Examples
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an order, should generate an email confirmation
x <- place_order_crypto(RH = RH,
symbol = "ETC", # Ticker symbol
type = "market", # Type of market order (market, limit)
time_in_force = "gtc", # Time period (gfd: good for day)
price = 1, # The highest price you are willing to pay
quantity = 1, # Number of shares you want
side = "buy") # buy or sell

# Cancel the order, should also generate an email confirmation
cancel_order_crypto(RH, x$cancel_url)

## End(Not run)
cancel_order_options  Cancel an existing options order on RobinHood

Description

Send a cancel signal for a particular order to RobinHood. You will need to retain the buy/sell order url returned from place_order_options().

Usage

cancel_order_options(RH, cancel_url)

Arguments

RH  object of class RobinHood
cancel_url (string) cancel url returned from place_order()

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an order, should generate an email confirmation
x <- place_order_options(RH = RH,
                          option_id = "346e46af-380e-4052-a7c2-15748f0fc0ca",
                          direction = "debit",  # one of "debit" or "credit"
                          side = "buy",        # one of "buy" or "sell"
                          quantity = 1,       # number of contracts
                          stop_price = .01,   # Time period (gfd: good for day)
                          type = "limit",     # limit or market (only limit is currently supported)
                          time_in_force = "gtc") # "gfd", "gtc", "ioc", "opg"

# Cancel the order, should also generate an email confirmation
cancel_order_options(RH, x$cancel_url)

## End(Not run)

check_rh  Checks to see if you have a valid RobinHood object

Description

Checks to see if you have a valid RobinHood object

Usage

check_rh(RH)
get_accounts

Arguments

RH object of class RobinHood

get_accounts Get data related to your RobinHood account

Description

Get data related to your RobinHood account

Usage

get_accounts(RH)

Arguments

RH object of class RobinHood

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_accounts(RH)
## End(Not run)

get_ach

Get ACH data from your RobinHood linked bank accounts

Description

Get ACH data from your RobinHood linked bank accounts

Usage

get_ach(RH, action, status_url = NULL)

Arguments

RH object of class RobinHood
action (string) one of "transfers", "relationships", "schedules", "status"
status_url (string) URL returned by place_ach_transfer()
get_contracts  
Get a option contracts from RobinHood

Description
Get a option contracts from RobinHood

Usage
get_contracts(RH, chain_symbol, type, detail = FALSE)

Arguments
- RH: object class RobinHood
- chain_symbol: (string) a single ticket symbol
- type: (string) one of call or put
- detail: (logical) if TRUE (default) return additional info on greeks, previous day, high/low fill rate prices

Examples
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_contracts(RH, "IR")
## End(Not run)

get_fundamentals  
Get fundamental investment statistics for a particular ticker symbol

Description
Get fundamental investment statistics for a particular ticker symbol

Usage
get_fundamentals(RH, ticker, include_description = FALSE)

Arguments
- RH: object of class RobinHood
- ticker: (string) vector of ticker symbols
- include_description: (logical) include a long description of the company (default: FALSE)
get_historicals

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_fundamentals(RH, "CAT")

## End(Not run)

---

get_historicals  

Get historical price history from RobinHood

Description

Returns a data frame of historical price history for a given symbol.

Usage

get_historicals(RH, symbol, interval, span, tz = Sys.timezone())

Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object of class RobinHood</td>
</tr>
<tr>
<td>symbol</td>
<td>(string) Stock symbol to query, single symbol only</td>
</tr>
<tr>
<td>interval</td>
<td>(string) Interval of time to aggregate to (examples: hour, day, week, month)</td>
</tr>
<tr>
<td>span</td>
<td>(string) Period of time you are interested in (examples: day, week, month, year)</td>
</tr>
<tr>
<td>tz</td>
<td>(string) timezone returned by OlsonNames() (eg: &quot;America/Chicago&quot;)</td>
</tr>
</tbody>
</table>

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_historicals(RH = RH, symbol = "CAT", interval = "day", span = "month")

## End(Not run)
get_historicals_crypto

Get historical crypto price history from RobinHood

Description

Returns a data frame of historical crypto price history for a given symbol. Note that not all combinations of interval/span and bounds will return results. Spans that go beyond day (week, month, year) will not return results for certain bounds values (trading, extended). The function should return a message if you specify a combination of inputs that returns no results.

Usage

get_historicals_crypto(RH, symbol, interval, span, bounds, tz = Sys.timezone())

Arguments

RH object of class RobinHood
symbol (string) ticker symbol of crypto (BTC, ETH, ETC)
interval (string) Interval of time to aggregate to (examples: hour, day, week, month)
span (string) Period of time you are interested in (examples: day, week, month, year)
bounds (string) One of regular (6 hours), trading (9 hours), extended (16 hours), 24_7
 tz (string) timezone returned by OlsonNames() (eg: "America/Chicago")

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")
get_historicals_crypto(RH, symbol = "ETC", interval = "5minute", span = "day", bounds = 'regular')
get_historicals_crypto(RH, symbol = "ETC", interval = "5minute", span = "day", bounds = 'trading')
get_historicals_crypto(RH, symbol = "ETC", interval = "5minute", span = "day", bounds = 'extended')
get_historicals_crypto(RH, symbol = "ETC", interval = "5minute", span = "day", bounds = '24_7')

## End(Not run)
**get_market_hours**  
*Get open market hours*

**Description**  
Get a list of markets available on RobinHood with trading hours for a specific date.

**Usage**  
```r  
get_market_hours(RH, market_date = NULL, tz = Sys.timezone())  
```

**Arguments**  
- **RH** object of class RobinHood  
- **market_date** (string) date in the form ‘yyyy-mm-dd’, default today  
- **tz** (string) one of timezone returned by OlsonNames(), defaults to local

**Examples**  
```r  
## Not run:  
# Login in to your RobinHood account  
RH <- RobinHood("username", "password")  
get_market_hours(RH)  
## End(Not run)
```

---

**get_order_history**  
*Download all available order history for your RobinHood account*

**Description**  
Download all available order history for your RobinHood account

**Usage**  
```r  
get_order_history(RH, page_size = 1000)  
```

**Arguments**  
- **RH** object of class RobinHood  
- **page_size** (int) number of historical records to fetch
get_order_history_options

get_order_history_crypto

Description

Download all available crypto currency order history for your RobinHood account

Usage

get_order_history_crypto(RH)

Arguments

RH object of class RobinHood

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_order_history_crypto(RH)

## End(Not run)

get_order_history_options

Description

Download all available options order history for your RobinHood account

Usage

get_order_history_options(RH)

Arguments

RH object of class RobinHood

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_order_history_options(RH)

## End(Not run)
get_order_status

Usage

get_order_history_options(RH)

Arguments

RH object of class RobinHood

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_order_history(RH)

## End(Not run)

get_order_status Get a current status of an order on RobinHood

Description

Returns a list of order information given a buy/sell order url returned from place_order().

Usage

get_order_status(RH, status_url, limit_output = TRUE)

Arguments

RH object of class RobinHood
status_url (string) url of order returned from place_order
limit_output (logical) return limited info on the order (default TRUE)

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an order, should generate an email confirmation
x <- place_order(RH = RH, symbol = "GE", # Ticker symbol you want to trade
type = "market", # Type of market order
time_in_force = "gfd", # Time period the order is good for (gfd: good for day)
trigger = "immediate", # Trigger or delay order
price = 8.96, # The highest price you are willing to pay
quantity = 1, # Number of shares you want
get_order_status_crypto

Get a current status of an crypto currency order on RobinHood

Description

Returns a list of order information given a buy/sell order url returned from place_order().

Usage

get_order_status_crypto(RH, order_id)

Arguments

RH          object of class RobinHood
order_id    (string) id field of the object returned by place_order_crypto

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an order, should generate an email confirmation
x <- place_order_crypto(RH = RH,
                        symbol = "GE",      # Ticker symbol you want to trade
                        type = "market",   # Type of market order
                        time_in_force = "gfd",  # Time period (gfd: good for day)
                        trigger = "immediate", # Trigger or delay order
                        price = 8.96,        # The highest price you are willing to pay
                        quantity = 1,        # Number of shares you want
                        side = "buy")        # buy or sell

get_order_status_crypto(RH, order_id = x$id)

## End(Not run)
get_order_status_options

Get a current status of an option order on RobinHood

Description

Returns a list of order information given a buy/sell order url returned from place_order_options().

Usage

get_order_status_options(RH, status_url)

Arguments

RH object of class RobinHood
status_url (string) url of order returned from place_order

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an order, should generate an email confirmation
x <- place_order_options(RH = RH,
    option_id = "346e46af-380e-4052-a7c2-15748f0fc0ca",
    direction = "debit",  # one of "debit" or "credit"
    side = "buy",        # one of "buy" or "sell"
    quantity = 1,       # number of contracts
    stop_price = .01,   # Time period (gfd: good for day)
    type = "limit",     # limit or market (only limit is currently supported)
    time_in_force = "gtc") # "gfd", "gtc", "ioc", "opg"

get_order_status_options(RH, x$status_url)

## End(Not run)

get_portfolios

Get portfolio summaries related to your RobinHood Account

Description

Returns a dataframe of portfolio summaries for a specific period of time. Default is current day.

Usage

get_portfolios(RH, interval = NULL, span = NULL)
get_positions

Arguments

- **RH** object of class RobinHood
- **interval** (string) Interval of time to aggregate to (examples: hour, day, week, month)
- **span** (string) Period of time you are interested in (examples: day, week, month, year)

Examples

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_portfolios(RH)
get_portfolios(RH, interval = "day", span = "3month")
## End(Not run)
```

get_positions

Get the currently held positions for your RobinHood account

Description

Get the currently held positions for your RobinHood account

Usage

```r
get_positions(RH, limit_output = TRUE)
```

Arguments

- **RH** object class RobinHood
- **limit_output** (logical) if true, return a simplified positions table, false returns all position details

Examples

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_positions(RH)
## End(Not run)
```
get_positions_crypto

Get the currently held crypto positions for your RobinHood account

Description
Get the currently held crypto positions for your RobinHood account

Usage
get_positions_crypto(RH)

Arguments
RH object class RobinHood

Examples
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_positions_crypto(RH)

## End(Not run)

get_positions_options

Get the currently held positions for your RobinHood account

Description
Get the currently held positions for your RobinHood account

Usage
get_positions_options(RH, trim_pending = TRUE)

Arguments
RH object class RobinHood
trim_pending (logical) if FALSE, then return pending and intraday columns
Examples

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_positions_options(RH)

## End(Not run)
```

---

**get_quote**  
*Get a quote from RobinHood*

---

**Description**

Get a quote from RobinHood

**Usage**

```r
get_quote(RH, symbol, limit_output = TRUE)
```

**Arguments**

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object class RobinHood</td>
</tr>
<tr>
<td>symbol</td>
<td>(string) of ticker symbols</td>
</tr>
<tr>
<td>limit_output</td>
<td>(logical) if TRUE (default) return less quote detail</td>
</tr>
</tbody>
</table>

**Examples**

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_quote(RH, "IR")

## End(Not run)
```

---

**get_quote_crypto**  
*Get a crypto currency quote from RobinHood*

---

**Description**

Get a crypto currency quote from RobinHood

**Usage**

```r
get_quote_crypto(RH, symbol)
```
get_ratings

Arguments

RH  object class RobinHood
symbol  (string) crypto currency symbol such as BTC, ETH, DOGE

Examples

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_quote_crypto(RH, "BTC")

## End(Not run)
```

get_ratings  Get analyst ratings for a given equity symbol from RobinHood

Description

Get analyst ratings for a given equity symbol from RobinHood

Usage

```r
get_ratings(RH, symbol)
```

Arguments

RH  object class RobinHood
symbol  (string) Ticker symbol

Examples

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_ratings(RH, symbol = "CAT")

## End(Not run)
```
get_tag

Get ticker symbols for popular tags on RobinHood

Description

Get a data frame of ticker symbols and names linked to trending tags on the RobinHood website.

Usage

get_tag(RH, tag)

Arguments

RH object class RobinHood
tag (string) a hyphenated tag such as "100-most-popular"

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_tag(RH, "100-most-popular")

## End(Not run)

get_tickers

Download all financial instruments available on RobinHood

Description

Get a dataframe of all listed companies including ticker symbols and tradeability indicators.

Usage

get_tickers(RH, add_fundamentals = FALSE)

Arguments

RH object of class RobinHood
add_fundamentals (logical) if TRUE then return fundamental data (long run time)
get_user

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_tickers(RH)

## End(Not run)

get_user

Get personal user data related to your RobinHood account

Description

Get personal user data related to your RobinHood account

Usage

get_user(RH)

Arguments

RH object class RobinHood

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

get_user(RH)

## End(Not run)

logout

Logout of RobinHood

Description

Send a logout call through the RobinHood API service and disable your token.

Usage

logout(RH)
place_ach_transfer

Arguments

RH object of class RobinHood

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

logout(RH)

## End(Not run)

mod_json Converts a data frame to json minus the square brackets on the ends

Description

Converts a data frame to json minus the square brackets on the ends

Usage

mod_json(x, type)

Arguments

x dataframe intended for json conversion

type (string) one of "fromJSON" or "toJSON"

place_ach_transfer Place an ACH transfer to and from your RobinHood account

Description

Place an ACH transfer to and from your RobinHood account

Usage

place_ach_transfer(RH, action, amount, transfer_url)

Arguments

RH object of class RobinHood

action (string) one of "deposit", "withdraw"

amount (numeric) amount in dollars you want to deposit or withdraw

transfer_url (string) url of your linked account, output of get_ach(RH, "relationships")
place_order

**place_order**

*Place a buy or sell order against your RobinHood account*

**Description**

**Note**: Price cannot extend beyond 2 decimals  
**Note**: Quantity must be a whole number  
**Note**: Price * Quantity > $0.01

**Usage**

```r
place_order(
  RH,  
symbol,  
type,  
time_in_force,  
trigger,  
price,  
stop_price = NA,  
quantity,  
side
)
```

**Arguments**

- **RH**: object of class RobinHood
- **symbol**: (string) Ticket symbol you are attempting to buy or sell
- **type**: (string) "market" or "limit"
- **time_in_force**: (string) Good For Day ("gfd"), Good Till Canceled ("gtc"), Immediate or Cancel ("ioc"), or Opening ("opg")
- **trigger**: (string) "immediate" or "stop"
- **price**: (number) the price you are willing to sell or buy at
- **stop_price**: (number) if trigger = stop, enter stop price, otherwise leave blank
- **quantity**: (int) number of shares you wish to transact, must be a whole number
- **side**: (string) "buy" or "sell"

**Examples**

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an order, should generate an email confirmation
x <- place_order(RH = RH,  
symbol = "GE",  
type = "market",  
price = 70,  
quantity = 100)
```

place_order_crypto

Place a crypto currency buy or sell order against your RobinHood account

Description

**Note**: Price and Quantity can both extend beyond 2 decimals **Note**: Price * Quantity > $0.01

Usage

place_order_crypto(RH, symbol, type, time_in_force, price, quantity, side)

Arguments

RH object of class RobinHood
symbol (string) Ticket symbol you are attempting to buy or sell
type (string) "market" or "limit"
time_in_force (string) Good Till Canceled ("gtc"), Immediate or Cancel ("ioc"), or Opening ("opg")
price (number) the price you are willing to sell or buy at
quantity (number) number of shares you wish to transact
side (string) "buy" or "sell"

Examples

## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an order, should generate an email confirmation
x <- place_order_crypto(RH = RH,
symbol = "DOGE", # Ticker symbol
type = "market", # Type of market order (market, limit)
time_in_force = "gtc", # Time period (gfd: good for day)
price = .003, # The highest price you are willing to pay
quantity = 500, # Number of shares you want
side = "buy") # buy or sell

## End(Not run)
place_order_options

Place a options buy or sell order against your RobinHood account

Description

Place an order on an option contract. Currently only limit orders are supported so you must supply a price

Usage

place_order_options(
    RH,
    option_id,
    direction,
    side,
    quantity,
    stop_price = NULL,
    type = "limit",
    time_in_force
)

Arguments

<table>
<thead>
<tr>
<th>RH</th>
<th>object of class RobinHood</th>
</tr>
</thead>
<tbody>
<tr>
<td>option_id</td>
<td>(string) id returned from get_contracts()</td>
</tr>
<tr>
<td>direction</td>
<td>(string) one of &quot;debit&quot; or &quot;credit&quot;</td>
</tr>
<tr>
<td>side</td>
<td>(string) one of &quot;buy&quot; or &quot;sell&quot;</td>
</tr>
<tr>
<td>quantity</td>
<td>(integer) number of contracts to buy</td>
</tr>
<tr>
<td>stop_price</td>
<td>(numeric) stop price for a limit order</td>
</tr>
<tr>
<td>type</td>
<td>(string) &quot;limit&quot; or &quot;market&quot; (only limit is currently supported)</td>
</tr>
<tr>
<td>time_in_force</td>
<td>(string) Good Till Canceled (&quot;gtc&quot;), Immediate or Cancel (&quot;ioc&quot;), or Opening (&quot;opg&quot;)</td>
</tr>
</tbody>
</table>

Examples

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Place an options order, should generate an email confirmation
x <- place_order_options(RH = RH,
                           option_id = "346e46af-380e-4052-a7c2-15748f0fc0ca",
                           direction = "debit",  # one of "debit" or "credit"
                           side = "buy",  # one of "buy" or "sell"
                           quantity = 1,  # number of contracts
                           stop_price = .01,  # Time period (gfd: good for day)"
```
### RobinHood

**RobinHood Account Authentication**

**Description**

This function returns an object of S3 class RobinHood and establishes a connection to a RobinHood account. It is a required input for every other function in the package.

**Usage**

```r
RobinHood(username, password, mfa_code = NULL)
```

**Arguments**

- `username` (string) account email address
- `password` (string) password
- `mfa_code` (string) mfa_code provided by your authentication app (required if mfa is enabled)

**Examples**

```r
## Not run:
RH <- RobinHood("username", "password")
## End(Not run)
```

### watchlist

**Manage your RobinHood watchlist**

**Description**

Add and delete instruments from your RobinHood watchlist.

**Usage**

```r
watchlist(RH, action, watchlist = "", ticker = "")
```
Arguments

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RH</td>
<td>object class RobinHood</td>
</tr>
<tr>
<td>action</td>
<td>(string) one of: get, add, delete</td>
</tr>
<tr>
<td>watchlist</td>
<td>(string) name of watchlist to add, delete, or get instruments, null will return a list of watchlist</td>
</tr>
<tr>
<td>ticker</td>
<td>(string) list of tickers to add or delete, null will add or delete watchlist</td>
</tr>
</tbody>
</table>

Examples

```r
## Not run:
# Login in to your RobinHood account
RH <- RobinHood("username", "password")

# Get a vector of your watchlist names
watchlist(RH, action = "get")

# Get a vectors of symbols on your watchlist
watchlist(RH, action = "get", watchlist = "Default")

# Add a symbol to your watchlist
watchlist(RH, action = "add", watchlist = "Default", ticker = "CAT")

# Delete a symbol from your watchlist
watchlist(RH, action = "delete", watchlist = "Default", ticker = "CAT")

## End(Not run)
