Package ‘bupaverse’

October 12, 2022

Type Package
Title Easily Install and Load the 'bupaverse'
Version 0.1.0
Description The 'bupaverse' is an open-source, integrated suite of R-packages for handling and analysing business process data, developed by the Business Informatics research group at Hasselt University, Belgium. Profoundly inspired by the 'tidyverse' package, the 'bupaverse' package is designed to facilitate the installation and loading of multiple 'bupaverse' packages in a single step.

Description

This function lists all the conflicts between packages in the bupaverse and other packages that you have loaded.

Usage

bupaverse_conflicts()

Value

Returns a list all the conflicts between packages in the bupaverse and other packages that you have loaded.

Examples

bupaverse_conflicts()

Description

The bupaverse logo, using ASCII or Unicode characters.

Usage

bupaverse_logo(unicode = l10n_info()$`UTF-8`)
bupaverse_packages

Details

Use `cli::ansi_strip()` to get rid of the colors.

Value

Returns a `character` representing the `bupaverse` logo.

Examples

```
bupaverse_logo()
```

bupaverse_packages  List all packages in the bupaverse

Description

List all packages in the bupaverse

Usage

```
bupaverse_packages(include_self = TRUE)
```

Arguments

```
include_self  logical (default TRUE): Include `bupaverse` in the list?
```

Value

Returns a `list` of all packages included in the `bupaverse`.

Examples

```
bupaverse_packages()
```
