R topics documented:

appeals	1
requests	2

Index	3
--------------	----------

appeals	<i>Queries the appeals made through the Brazilian Right to Information Law</i>
---------	--

Description

Downloads data for the selected years, apply a filter and return it in the form of a dataframe.

Usage

```
appeals(year = "all", answer = F, search = "all")
```

Arguments

year	selects the years which data will be downloaded
answer	if true, fetches the content of the search argument in the appeals responses
search	selects the keyword to be searched

Value

a dataframe with appeals containing the keyword

Examples

```
## Not run: appeals(search = 'PAC')
```

requests	<i>Queries the requests made through the Brazilian Right to Information Law</i>
----------	---

Description

Downloads data for the selected years, apply a filter and return it in the form of a dataframe.

Usage

```
requests(year = "all", answer = F, search = "all")
```

Arguments

year	selects the years which data will be downloaded
answer	if true, fetches the content of the search argument in the request responses
search	selects the keyword to be searched

Value

a dataframe with requests containing the keyword

Examples

```
## Not run: requests(search = 'PAC')
```
