

Package ‘dashboardthemes’

August 26, 2020

Type Package

Title Customise the Appearance of 'shinydashboard' Applications using Themes

Version 1.1.3

Maintainer Nik Lilovski <nik.lilovski@outlook.com>

Description Allows manual creation of themes and logos to be used in applications created using the 'shinydashboard' package. Removes the need to change the underlying css code by wrapping it into a set of convenient R functions.

URL <https://github.com/nik01010/dashboardthemes>

BugReports <https://github.com/nik01010/dashboardthemes/issues>

Depends R (>= 3.2.3)

Imports htmltools (>= 0.3.5)

Suggests testthat, linter, knitr, rmarkdown, glue, covr

License MIT + file LICENSE

Encoding UTF-8

LazyData true

RoxygenNote 7.1.1

VignetteBuilder knitr

NeedsCompilation no

cssGradientThreeColors
<i>cssGradientThreeColors</i>

Description

Generates CSS code for a gradient with three colors

Usage

```
cssGradientThreeColors(  
  direction = "down",  
  colorStart,  
  colorMiddle,  
  colorEnd,  
  colorStartPos = 0,  
  colorMiddlePos = 50,  
  colorEndPos = 100  
)
```

Arguments

- | | |
|---------------|---|
| direction | String. Direction of the gradient (down/right). Defaults to down. |
| colorStart | String. Start (top/left) colour of the gradient. |
| colorMiddle | String. Middle colour of the gradient. |
| colorEnd | String. End (bottom/right) colour of the gradient. |
| colorStartPos | Numeric. Position of the start colour. Defaults to 0. |

colorMiddlePos Numeric. Position of the middle colour. Defaults to 50.
 colorEndPos Numeric. Position of the end colour; defaults to 100.

Value

CSS code. Gradient with three colors.

See Also

Examples

```
cssGradientThreeColors(  
  direction = "right"  
  ,colorStart = "rgba(44,222,235,1)"  
  ,colorMiddle = "rgba(44,222,235,1)"  
  ,colorEnd = "rgba(0,255,213,1)"  
  ,colorStartPos = 0  
  ,colorMiddlePos = 30  
  ,colorEndPos = 100  
)
```

dashboardthemes	<i>dashboardthemes: a package for custom themes in shinydashboard applications</i>
-----------------	--

Description

The dashboardthemes package provides two main important features:

- Using new pre-defined themes and logos for dashboards.
- Creating custom themes and logos for dashboards.

Available functions

The available functions are:

- [shinyDashboardThemes](#): Calls a custom theme created using shinyDashboardThemeDIY.
- [shinyDashboardLogo](#): Calls a custom logo created using shinyDashboardLogoDIY.
- [shinyDashboardThemeDIY](#): Creates a custom theme object.
- [shinyDashboardLogoDIY](#): Creates a custom logo object. Inspired from [here](#).
- [cssGradientThreeColors](#): Creates a three colour gradient to be used in themes.

logo_blue_gradient	<i>logo_blue_gradient</i>
--------------------	---------------------------

Description

Blue Gradient logo for a shinydashboard application

Usage

```
logo_blue_gradient(boldText = "Shiny", mainText = "App", badgeText = "v1.1")
```

Arguments

boldText	String. Bold text for the logo.
mainText	String. Main text for the logo.
badgeText	String. Text for the logo badge.

Value

Object produced by shinyDashboardLogoDIY

See Also

[shinyDashboardLogoDIY](#)

logo_flat_red	<i>logo_flat_red</i>
---------------	----------------------

Description

Flat Red logo for a shinydashboard application

Usage

```
logo_flat_red(boldText = "Shiny", mainText = "App", badgeText = "v1.1")
```

Arguments

boldText	String. Bold text for the logo.
mainText	String. Main text for the logo.
badgeText	String. Text for the logo badge.

Value

Object produced by shinyDashboardLogoDIY

See Also[shinyDashboardLogoDIY](#)

logo_grey_dark	<i>logo_grey_dark</i>
----------------	-----------------------

Description

Grey Dark logo for a shinydashboard application

Usage

```
logo_grey_dark(boldText = "Shiny", mainText = "App", badgeText = "v1.1")
```

Arguments

boldText	String. Bold text for the logo.
mainText	String. Main text for the logo.
badgeText	String. Text for the logo badge.

Value

Object produced by shinyDashboardLogoDIY

See Also[shinyDashboardLogoDIY](#)

logo_grey_light	<i>logo_grey_light</i>
-----------------	------------------------

Description

Grey Light logo for a shinydashboard application

Usage

```
logo_grey_light(boldText = "Shiny", mainText = "App", badgeText = "v1.1")
```

Arguments

boldText	String. Bold text for the logo.
mainText	String. Main text for the logo.
badgeText	String. Text for the logo badge.

Value

Object produced by shinyDashboardLogoDIY

See Also

[shinyDashboardLogoDIY](#)

logo_onenote	<i>logo_onenote</i>
--------------	---------------------

Description

OneNote logo for a shinydashboard application

Usage

```
logo_onenote(boldText = "Shiny", mainText = "App", badgeText = "v1.1")
```

Arguments

- boldText String. Bold text for the logo.
- mainText String. Main text for the logo.
- badgeText String. Text for the logo badge.

Value

Object produced by shinyDashboardLogoDIY

See Also

[shinyDashboardLogoDIY](#)

logo_poor_mans_flatly	<i>logo_poor_mans_flatly</i>
-----------------------	------------------------------

Description

Poor Man’s Flatly logo for a shinydashboard application

Usage

```
logo_poor_mans_flatly(boldText = "Shiny", mainText = "App", badgeText = "v1.1")
```

Arguments

<code>boldText</code>	String. Bold text for the logo.
<code>mainText</code>	String. Main text for the logo.
<code>badgeText</code>	String. Text for the logo badge.

Value

Object produced by `shinyDashboardLogoDIY`

See Also

[shinyDashboardLogoDIY](#)

`logo_purple_gradient` *logo_purple_gradient*

Description

Purple Gradient logo for a shinydashboard application

Usage

```
logo_purple_gradient(boldText = "Shiny", mainText = "App", badgeText = "v1.1")
```

Arguments

<code>boldText</code>	String. Bold text for the logo.
<code>mainText</code>	String. Main text for the logo.
<code>badgeText</code>	String. Text for the logo badge.

Value

Object produced by `shinyDashboardLogoDIY`

See Also

[shinyDashboardLogoDIY](#)

shinyDashboardLogo	<i>shinyDashboardLogo</i>
--------------------	---------------------------

Description

Calls a custom logo object created using shinyDashboardLogoDIY

Usage

```
shinyDashboardLogo(  
  theme,  
  boldText = "Shiny",  
  mainText = "App",  
  badgeText = "v1.1"  
)
```

Arguments

theme	String. Name of theme to be used
boldText	String. Bold text for the logo.
mainText	String. Main text for the logo.
badgeText	String. Text for the logo badge.

Value

HTML code. Logo for shinydashboard's sidebar.

Note

This logo design was inspired from <http://www.dataseries.org/>.

Examples

```
#...  
### ui  
#ui <- dashboardPage(  
  
  ### ui header  
  #dashboardHeader(  
  
    ### changing logo  
    title = shinyDashboardLogo(  
      theme = "blue_gradient",
```

```
    boldText = "Shiny",  
    mainText = "App",  
    badgeText = "v1.1"  
  )  
  #...
```

shinyDashboardLogoDIY *shinyDashboardLogoDIY*

Description

Creates a custom logo object for a shinydashboard application

Usage

```
shinyDashboardLogoDIY(  
  boldText,  
  mainText,  
  textSize = 15,  
  badgeText,  
  badgeTextColor,  
  badgeTextSize = 2,  
  badgeBackColor,  
  badgeBorderRadius = 3  
)
```

Arguments

<code>boldText</code>	String. Bold text for the logo.
<code>mainText</code>	String. Main text for the logo.
<code>textSize</code>	Numeric. Text size for the logo. Defaults to 15.
<code>badgeText</code>	String. Text for the logo badge.
<code>badgeTextColor</code>	String. Text color of the logo badge.
<code>badgeTextSize</code>	Numeric. Text color of the logo badge. Defaults to 2.
<code>badgeBackColor</code>	String. Background color of the logo badge.
<code>badgeBorderRadius</code>	Numeric. Border radius of the logo badge. Defaults to 3.

Value

HTML code. Logo for shinydashboard's sidebar.

Note

This logo design was inspired from <http://www.dataseries.org/>.

    tableBorderTopSize,
    tableBorderRowSize,
    primaryFontColor = "auto",
    successFontColor = "auto",
    warningFontColor = "auto",
    dangerFontColor = "auto",
    infoFontColor = "auto",
    boxInfoColor = "auto"
  )

```

Arguments

```

appFontFamily   String. Application font.
appFontColor    String. Application font colour.
logoBackColor   String. Logo background colour.
bodyBackColor   String. Main page background colour.
headerButtonBackColor
                String. Sidebar toggle button background colour.
headerButtonIconColor
                String. Sidebar toggle button icon colour.
headerButtonBackColorHover
                String. Sidebar toggle button background colour: hovered.
headerButtonIconColorHover
                String. Sidebar toggle button icon colour: hovered.
headerBackColor
                String. Top header background colour.
headerBoxShadowColor
                String. Top header shadow colour.
headerBoxShadowSize
                String. Top header shadow size.
sidebarBackColor
                String. Sidebar background colour.
sidebarPadding  Numeric. Sidebar inner padding.
sidebarShadowRadius
                String. Sidebar shadow radius.
sidebarShadowColor
                String. Sidebar shadow colour.
sidebarMenuBackColor
                String. Sidebar menu background colour.
sidebarMenuPadding
                Numeric. Sidebar menu inner padding.

```

sidebarMenuBorderRadius
Numeric. Sidebar menu shape radius.

sidebarUserTextColor
String. Sidebar userbox text colour.

sidebarSearchBackColor
String. Sidebar searchbox background colour.

sidebarSearchIconColor
String. Sidebar searchbox icon colour.

sidebarSearchBorderColor
String. Sidebar searchbox border line colour.

sidebarTabTextColor
String. Sidebar tab font colour.

sidebarTabTextSize
Numeric. Sidebar tab font size.

sidebarTabBorderStyle
String. Sidebar tab border line style.

sidebarTabBorderColor
String. Sidebar tab border line colour.

sidebarTabBorderWidth
Numeric. Sidebar tab border line width.

sidebarTabBackColorSelected
String. Sidebar tab background colour: selected.

sidebarTabTextColorSelected
String. Sidebar tab font colour: selected.

sidebarTabRadiusSelected
String. Sidebar tab shape radius: selected.

sidebarTabTextColorHover
String. Sidebar tab font colour: hovered.

sidebarTabBackColorHover
String. Sidebar tab background colour: hovered.

sidebarTabBorderStyleHover
String. Sidebar tab border line style: hovered.

sidebarTabBorderColorHover
String. Sidebar tab border line colour: hovered.

sidebarTabBorderWidthHover
Numeric. Sidebar tab border line width: hovered.

sidebarTabRadiusHover
String. Sidebar tab shape radius: hovered.

boxBackColor
String. Box background colour.

boxBorderRadius
Numeric. Box shape radius.

boxShadowSize
String. Box shadow size.

boxShadowColor
String. Box shadow colour.

boxTitleSize
Numeric. Box title font size.

`boxDefaultColor` String. Box default highlight colour.

`boxPrimaryColor` String. Box primary highlight colour.

`boxSuccessColor` String. Box success highlight colour.

`boxWarningColor` String. Box warning highlight colour.

`boxDangerColor` String. Box danger highlight colour.

`tabBoxTabColor` String. Tab box tab background colour.

`tabBoxTabTextSize` Numeric. Tab box tab font size.

`tabBoxTabTextColor` String. Tab box tab font colour.

`tabBoxTabTextColorSelected` String. Tab box tab font colour: selected.

`tabBoxBackColor` String. Tab box body background colour.

`tabBoxHighlightColor` String. Tab box highlight colour.

`tabBoxBorderRadius` Numeric. Tab box shape radius.

`buttonBackColor` String. Button background colour.

`buttonTextColor` String. Button font colour.

`buttonBorderColor` String. Button border line colour.

`buttonBorderRadius` Numeric. Button shape radius.

`buttonBackColorHover` String. Button background colour: hovered.

`buttonTextColorHover` String. Button font colour: hovered.

`buttonBorderColorHover` String. Button border line colour: hovered.

`buttonHeight` Numeric. Button shape height. Defaults to 34.

`buttonPadding` String. Button label padding. Defaults to "6px 12px".

`textboxBackColor` String. Textbox background colour.

`textboxBorderColor` String. Textbox border line colour.

`textboxBorderRadius` Numeric. Textbox shape radius.

```

textboxBackColorSelect
    String. Textbox background colour: selected.
textboxBorderColorSelect
    String. Textbox border line colour: selected.
textboxHeight    Numeric. Textbox shape height. Defaults to 34.
textboxPadding   String. Textbox text padding. Defaults to "6px 12px".
tableBackColor   String. Table background colour.
tableBorderColor
    String. Table border line colour.
tableBorderTopSize
    Numeric. Table header line size.
tableBorderRowSize
    Numeric. Table row separator line size.
primaryFontColor
    String. Primary status highlight font colour.
successFontColor
    String. Success status highlight font colour.
warningFontColor
    String. Warning status highlight font colour.
dangerFontColor
    String. Danger status highlight font colour.
infoFontColor    String. Info status highlight font colour.
boxInfoColor     String. Box info highlight colour.

```

Value

CSS code. Theme for a shinydashboard application.

shinyDashboardThemes	<i>shinyDashboardThemes</i>
----------------------	-----------------------------

Description

Calls a custom theme object created using shinyDashboardThemeDIY

Usage

```
shinyDashboardThemes(theme)
```

Arguments

theme	String. Name of theme to be used
-------	----------------------------------

Value

CSS code. Theme for shinydashboard.

Available themes

- **blue_gradient**: Demonstrates use of gradients, shadows and rounded corners.
- **flat_red**: Flat colour theme with red highlights.
- **grey_light**: Lightweight grey theme.
- **grey_dark**: Demonstrates use of inverted dark colour schemes.
- **onenote**: Styled similarly to the OneNote application.
- **poor_mans_flatly**: Poor man's version of the **Flatly** theme.
- **purple_gradient**: Demonstrates use of dark gradients and rounded corners.
