Package ‘feedeR’

October 25, 2016

Type Package
Title Read RSS/Atom Feeds from R
Version 0.0.7
Description Retrieve data from RSS/Atom feeds.
URL https://github.com/DataWookie/feedeR
BugReports https://github.com/DataWookie/feedeR/issues
License GPL-3
Encoding UTF-8
LazyData true
Imports RCurl, dplyr, XML, lubridate, digest
Suggests testthat
RoxygenNote 5.0.1
NeedsCompilation no
Author Andrew Collier [aut, cre]
Maintainer Andrew Collier <andrew@exegetic.biz>
Repository CRAN
Date/Publication 2016-10-25 20:32:10

R topics documented:

feed.extract ................................................................. 2
parse.rdf ................................................................. 2

Index 4
feed.extract  
Extract data from feeds

Description
Read feed metadata and entries.

Usage
feed.extract(url, encoding = integer())

Arguments
url              URL for the feed.
encoding         Explicitly identify the encoding of the content.

Value
A list containing the following elements:
- title: Title of the original site.
- link: A link to the original site.
- updated: When the feed was last updated.
- items: A data frame with records for each entry in the feed.
- hash: A hash key constructed from the post link. This is intended for easy indexing.

Examples
## Not run:
feed.extract("https://feeds.feedburner.com/RBloggers")
feed.extract("http://journal.r-project.org/rss.atom")

## End(Not run)

parse.rdf  
Parse feeds encoded in RDF/XML.

Description
Parse feeds encoded in RDF/XML.

Usage
parse.rdf(feed)
Arguments

feed The URL of the feed.

References

Examples

## not run:
parse.rdf(feed.read("http://feeds.feedburner.com/oatmealfeed"))

## End(Not run)
