df *Describe Files*

Description

Describe Files

Usage

```
df(dir = ".", all.files = TRUE, ...)
```

Arguments

<code>dir</code>	the directory containing the files to describe
<code>all.files</code>	logical, include hidden files and folders
<code>...</code>	additional arguments to pass to <code>list.files</code>

Value

A data.frame containing file information for all files in `dir`

Examples

```
df()
```

 lf

Enhanced Working Directory View

Description

Enhanced Working Directory View

Usage

```
lf(dir = ".", hidden.files = TRUE, hidden.dirs = FALSE, ...)
```

Arguments

<code>dir</code>	character, the directory in which to view files
<code>hidden.files</code>	logical, include hidden files
<code>hidden.dirs</code>	logical, include hidden directories
<code>...</code>	additional arguments to pass to <code>list.files</code> which this function is built around

Value

a data.frame of the directories and files names in presentation format

Examples

```
lf()
```

Index

df, 1
