use_gotop ............................................................ 2

Index 4
Description
Add scroll up icon

Usage
use_gotop(
    src = "fas fa-chevron-up",
    width = 45,
    opacity = 0.5,
    place = "right",
    color = "",
    appear = 200,
    scrolltime = 800,
    fadein = 500,
    fadeout = 500,
    marginX = 2,
    marginY = 2,
    container = "",
    zIndex = 9
)

Arguments
src
    string The CSS classes used to display the arrow.
width
    integer The width of the arrow.
opacity
    decimal Sets the transparency level for the arrow, where 1 is not transparent at all, 0.5 is 50 percent see-through and 0 is completely transparent.
place
    string The location where the arrow will be shown. Valid values are “right” or “left”.
color
    string The color of the selected CSS classes icon.
appear
    integer The amount of pixels the page must be scrolled down before the arrow is displayed.
scrolltime
    integer A number determining how long the animation will run when scrolling to the top of the page.
fadein
    integer A number determining how long the animation will run when fading into opaque.
fadeout
    integer A number determining how long the animation will run when fading out to transparent.
marginX
    integer The percentage amount indicating how far away the arrow is from the bottom, left, or right, depending on the value of place.
use_gotop

<table>
<thead>
<tr>
<th>Argument</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>marginY</td>
<td>integer The percentage amount indicating how far away the arrow is from the top or bottom, depending on the value of place.</td>
</tr>
<tr>
<td>container</td>
<td>string The HTML element to which the scroll function will be attached. If no value is given, then the scroll function will be attached to the window.</td>
</tr>
<tr>
<td>zIndex</td>
<td>integer The z-index value.</td>
</tr>
</tbody>
</table>

**Value**

Javascript code initializing GoTop with dependencies

**Examples**

use_gotop()
Index

use_gotop, 2
