cat_for_status

Use cat or dog pictures for various HTTP status codes

Description

Use cat or dog pictures for various HTTP status codes

Usage

cat_for_status(code, browse = FALSE)
dog_for_status(code, browse = FALSE)

Arguments

code An http status code
browse (logical) If TRUE, opens image in default browser. If FALSE, returns the URL of the image.

Details

uses a service for cats (https://http.cat) and dogs (https://httpstatusdogs.com)

Value

Opens image in your default browser, or returns URL
Examples

```r
## Not run:
# give back url
cat_for_status(100)
dog_for_status(100)
cat_for_status(301)
dog_for_status(301)
cat_for_status(400)
dog_for_status(400)

# open image in default browser
cat_for_status(400, browse=TRUE)

# not found
# cat_for_status(555)

## End(Not run)
```

---

**http**  
*Find out about http status codes*

**Description**
Find out about http status codes

**Usage**

```r
http_code(code, verbose = FALSE)
http_search(text, verbose = FALSE)
```

**Arguments**

- `code` (character) An http status code, or a regex search for HTTP status codes. must be length 1. required
- `verbose` (logical) include verbose status code explanation. Default: `FALSE`
- `text` (character) A text string to search the messages or descriptions of HTTP status codes. required

**Value**

on S3 object of class `http_code`, that is inside a list of the form:

- `status_code` - the status code
- `message` - very brief message explaining the code
- `explanation` - more verbose explanation, but still short
- `explanation_verbose` - the complete explanation
Examples

# search by code
http_code(100)
http_code(400)
http_code(503)
## verbose explanation
http_code(100, verbose = TRUE)
http_code(400, verbose = TRUE)
http_code(503, verbose = TRUE)

# fuzzy code search
http_code('1xx')
http_code('3xx')
http_code('30[12]')
http_code('30[34]')
http_code('30[34]')
## verbose explanation
http_code('1xx', verbose = TRUE)
http_code('3xx', verbose = TRUE)

# search by text message
http_search("request")
http_search("forbidden")
http_search("too")
## verbose explanation
http_search("request", verbose = TRUE)

## Not run:
http_search("birds")
http_code(999)

## End(Not run)
