Package ‘mlt.docreg’

October 13, 2022

Title Most Likely Transformations: Documentation and Regression Tests
Version 1.1-6
Date 2022-08-15
Description Additional documentation, a package vignette and regression tests for package mlt.
Depends mlt (>= 1.3-2)
Imports numDeriv, stats, eha, multcomp (>= 1.4-4), lattice, survival, flexsurv, truncreg
Suggests variables, basefun, MASS, TH.data, knitr, prodlim, gridExtra, nnet, HSAUR3, sandwich, grid, latticeExtra, colorspace, mcev, ICsurv, polspline, logspline, bshazard, gss, TransModel, dynsurv, timereg, survivalMPL, gamlss, Matrix, muhaz, ordinal, VGAM, AER, coin, gamlss.data, mlbench, tram (>= 0.6-0), rms
VignetteBuilder knitr

R topics documented:

checkGH ................................................................. 2

Index 3
checkGH

Check Gradient and Hessian

Description
Check analytic gradient and hessian against their numerical approximation

Usage
checkGH(object)

Arguments
object an object of class mlt as returned by mlt

Details
Computes the gradient and hessian analytically and numerically and compares the two. Warnings are suppressed for the numerical approximations as they are not aware of model constraints which might get violated.
