

Package ‘rsparkling’

September 19, 2017

Title R Interface for H2O Sparkling Water

Version 0.2.2

Imports utils, sparklyr (>= 0.3), h2o (>= 3.8.3.3)

Suggests dplyr, testthat

Description An extension package for 'sparklyr' that provides an R interface to H2O Sparkling Water machine learning library (see <<https://github.com/h2oai/sparkling-water>> for more information).

as_h2o_frame *Convert a Spark DataFrame to an H2O Frame*

Description

Convert a Spark DataFrame to an H2O Frame

Usage

```
as_h2o_frame(sc, x, name = NULL, strict_version_check = TRUE)
```

Arguments

sc Object of type spark_connection.
x A spark_dataframe.
name The name of the H2OFrame.
strict_version_check
 (Optional) Setting this to FALSE does not cross check version of H2O and at-
 tempts to connect.

as_spark_dataframe *Convert an H2O Frame to a Spark DataFrame*

Description

Convert an H2O Frame to a Spark DataFrame

Usage

```
as_spark_dataframe(sc, x, name = paste(deparse(substitute(x)), collapse = ""),  
                    strict_version_check = TRUE)
```

Arguments

sc Object of type spark_connection.
x An H2OFrame.
name The name to assign the data frame in Spark.
strict_version_check
 (Optional) Setting this to FALSE does not cross check version of H2O and at-
 tempts to connect.

h2o_context	<i>Get the H2OContext. Will create the context if it has not been previously created.</i>
-------------	---

Description

Get the H2OContext. Will create the context if it has not been previously created.

Usage

```
h2o_context(x, strict_version_check = TRUE)
```

Arguments

x	Object of type spark_connection or spark_jobj.
strict_version_check	(Optional) Setting this to FALSE does not cross check version of H2O and attempts to connect.

h2o_flow	<i>Open the H2O Flow UI in a browser</i>
----------	--

Description

Open the H2O Flow UI in a browser

Usage

```
h2o_flow(sc, strict_version_check = TRUE)
```

Arguments

sc	Object of type spark_connection.
strict_version_check	(Optional) Setting this to FALSE does not cross check version of H2O and attempts to connect.

h2o_release_table	<i>Provide integration information for rsparkling</i>
-------------------	---

Description

Provide integration information for rsparkling

Usage

```
h2o_release_table()
```

Value

Returns a data frame containing rsparkling integration information
