Package ‘rversions’

August 2, 2016

Title  Query ‘R’ Versions, Including ‘r-release’ and ‘r-oldrel’

Version 1.0.3

Description Query the main ‘R’ ‘SVN’ repository to find the versions ‘r-release’ and ‘r-oldrel’ refer to, and also all previous ‘R’ versions and their release dates.

R topics documented:

   r_oldrel .................................................. 2
   r_release ................................................ 2
   r_versions .............................................. 3

Index 4
r_oldrel

**Description**

R-oldrel is the latest version of the previous minor version. We extract version numbers from the R SVN repository tags.

**Usage**

```r
r_oldrel(dots = TRUE)
```

**Arguments**

- `dots` Whether to use dots instead of dashes in the version number.

**Value**

A one row data frame, with columns 'version' and 'date'.

**Examples**

```r
r_oldrel()
```

r_release

**Version number of R-release**

**Description**

The latest tag in the SVN repository (in terms of version numbers, not dates).

**Usage**

```r
r_release(dots = TRUE)
```

**Arguments**

- `dots` Whether to use dots instead of dashes in the version number.

**Value**

A one row data frame, with columns 'version' and 'date'.

**Examples**

```r
r_release()
```
Description

R version numbers consist of three numbers (since version 1.4.1): major, minor and patch.

Usage

```r
r_versions(dots = TRUE)
```

Arguments

- `dots` Whether to use dots instead of dashes in the version number.

Details

We extract the version numbers from the tags in the SVN repository.

Value

A data frame with two character columns: ‘version’ and ‘date’.

Examples

```r
r_versions()
```
