

Package ‘shinyKGode’

February 12, 2018

Type Package

Title An Interactive Application for ODE Parameter Inference Using Gradient Matching

Version 1.0.5

Author Joe Wandy

Maintainer Joe Wandy <joe.wandy@glasgow.ac.uk>

Description An interactive Shiny application to perform fast parameter inference on dynamical systems (described by ordinary differential equations) using gradient matching. Please see the project page for more details.

| shinyKGode | <i>shinyKGode: A Shiny package for gradient matching parameter inference on ordinary differential equations.</i> |
|------------|--|

Description

The shinyKGode package provides three main functions: a friendly Shiny-based user-interface to run gradient matching to solve ordinary differential equations, a selection of three built-in models and also the ability to import user-defined differential equations and perform parameter inference on them.

| startShinyKGode | <i>This function will start ShinyKGode.</i> |
|-----------------|---|

Description

An interactive Shiny application for running gradient matching to approximate ODEs.

Usage

```
startShinyKGode()
```

Details

Start ShinyKGode

This starts the ShinyKGode application on the user's local computer.

Value

Nothing

Examples

```
{  
  if(interactive()){  
    startShinyKGode()  
  }  
}
```
