Package ‘stlTDNN’

October 14, 2022

Type Package
Title STL Decomposition and TDNN Hybrid Time Series Forecasting
Version 0.1.0
Maintainer Girish Kumar Jha <girish.stat@gmail.com>
License GPL-3
Encoding UTF-8
LazyData true
RoxygenNote 7.1.1
Imports forecast, nnfor
Depends R (>= 2.10)
NeedsCompilation no
Author Girish Kumar Jha [aut, cre],
Ronit Jaiswal [aut, ctb],
Kapil Choudhary [ctb],
Rajeev Ranjan Kumar [ctb]
Repository CRAN
Date/Publication 2021-02-24 09:20:03 UTC

Data_potato

Normalized Monthly Average Potato Price of India

Description

Normalized Monthly Average Potato Price of India from January 2010 to July 2020.

Usage

data("Data_potato")

Format

A time series data with 127 observations.

price  a time series

Details

Dataset contains 127 observations of normalized monthly average potato price of India. It is obtained from World Bank "Pink sheet".

STLTDNN

STL Based TDNN Hybrid Forecast

Description

The STLTDNN function forecasts univariate time series using a hybrid model made of a decomposition technique called seasonal trend decomposition based on loess (STL) and a neural network based forecasting technique called time delay neural network (TDNN). The function further computes the values of different forecasting evaluation criteria.

Usage

STLTDNN(data, stepahead=12)
Arguments

- data: Input univariate time series (ts) data.
- stepahead: The forecast horizon.

Details

This function decomposes a nonlinear, nonstationary and seasonal time series into trend-cycle, seasonal and remainder component using STL (Cleveland et al., 1990). Time delay neural network is used to forecast these components individually (Jha and Sinha, 2014). Finally, the prediction results of all the three components are aggregated to formulate an ensemble output for the input time series.

Value

- data_test: Testing set used to measure the out of sample performance.
- STLcomp_forecast: Forecasted value of all individual components.
- FinalstlTDNN_forecast: Final forecasted value of the stlTDNN model. It is obtained by combining the forecasted value of all individual components.
- MAE_stlTDNN: Mean Absolute Error (MAE) for stlTDNN model.
- SMAPE_stlTDNN: Mean Absolute Percentage Error (MAPE) for stlTDNN model.
- RMSE_stlTDNN: Root Mean Square Error (RMSE) for stlTDNN model.
