Package ‘turkeyelections’

April 30, 2024

Type Package

Title The Most Comprehensive R Package for Turkish Election Results

Version 0.1.2

Description Includes the results of general, local, and presidential elections held in Turkey between 1995 and 2023, broken down by provinces and overall national results. It facilitates easy processing of this data and the creation of visual representations based on these election results.

Information for the results of the presidential election in Turkey by province in 2014

Description

A dataset showing the information for the candidates competing in the presidential election, and their votes in count and percentage.
cb_2014_turkiye

Usage

cb_2014_il

Format
data frame with 81 rows and 10 variables

Il_Adi  il adi, the name of the province
Kayitli_Secmen_Sayisi  kayitli secmen sayisi, the number of voters
Oy_Kullanan_Secmen_Sayisi  oy kullanan secmen sayisi, the number of voters who vote
Gecerli_Oy_Toplami  gecerli oy sayisi, the number of valid votes
RECEP_TAYYIP_ERDOGAN  recep tayyip erdoganin aldigi oy sayisi, the number of valid votes that recep tayyip erdogan received
SELAHATTIN_DEMIRTAS  selahattin demirtasin aldigi oy sayisi, the number of valid votes that selahattin demirtas received
EKMELEDDIN_MEHMET_IHSANOGLU  ekmeleddin mehmet ihsanoglu'nun aldigi oy sayisi, the number of valid votes that ekmeleddin mehmet ihsanoglu received
RECEP_TAYYIP_ERDOGAN_%  recep tayyip erdoganin aldigi oy yuzdesi, the percentage of valid votes that recep tayyip erdogan received
SELAHATTIN_DEMIRTAS_%  selahattin demirtasin aldigi oy yuzdesi, the percentage of valid votes that selahattin demirtas received
EKMELEDDIN_MEHMET_IHSANOGLU_%  ekmeleddin mehmet ihsanoglu'nun aldigi oy yuzdesi, the percentage of valid votes that ekmeleddin mehmet ihsanoglu received

**show_parliament**

Description

A function that visualizes parliament with respect to election results across Turkey.

Usage

`show_parliament(x)`

Arguments

- `x` The name of the data frame which is for the general election, so the name should contain `genel` in its name.

Value

A visual that shows the parliament for the given election result.

Examples

`show_parliament()`

**show_province_and_party**

Description

A function that displays the election results of a specified political party in a given province, both as percentages and as absolute figures, in the form of a graph.

Usage

`show_province_and_party(province = "Ankara", party = "CHP", percentage = FALSE)`

Arguments

- `province` The name of the province that users want to look for.
- `party` The name of the political party that users want to look for.
- `percentage` It is a boolean argument which allows you to print the plot with the percentage or not.
show_result_for_turkey

Value

A visual that shows the election results of a specified political party in a given province

Examples

show_province_and_party()

show_result_for_turkey

show_result_for_turkey

Description

A function that visualizes election results across Turkey, with the option to display the results either as percentages or as absolute numbers.

Usage

show_result_for_turkey(x, percentage = FALSE)

Arguments

x the name of the data frame to be visualized. It is supposed to be the one including name turkey in the file name.
percentage It is a boolean argument which allows you to print the plot with the percentage or not

Value

A visual that shows the percentages for each parties for the given election result

Examples

show_result_for_turkey()
